

ALU Cow Catching Lane DATASHEET JUNE 2017

Our cow catching fold plays an important role in the overall process of hoof trimming. The catching fold is used when attached to a hoof trimming chute. The cows will be waiting in the catching lane, where they are kept calm, and are well organized on their way into the hoof trimming chute.

Use a catching fold to avoid the mess of herding cows into the chute and improve trimming efficiency.

- ▶ Made with two gates and lateral bars for better stability.
- ▶ Enough length for one cow between gates.
- ▶ Easy to move and set up with light aluminum profile.
- ▶ Foldable design. The length and entrance width can be adjusted freely.

Material: 100% Aluminum

Size: W940 x H1900 x 7548mm
