

# Operation: Rope Replacement January 2016 FARMNOLOGY ®

- 1) First you need to prepare 2 rope x 1.5 meter x 8mm diameter
- 2) The two end of the rope should be heated scald smooth
- 3) Fixed the first rope according to the following pictures

- 4) Fixed the second rope according to the following pictures

Check the tightness of straight rope and oblique rope, keep it the same and the rope should slide in the 2 pulley grooves. ALWAYS use rope purchased from Farmnology as it is made especially for the machines with extreme high pull force and design.
